Soothing cedars, mountains and golf greenery greet you from every window of this house. And out on the spacious decks you get even closer to nature (instead of neighbors). Real cedar siding adds to the woody feeling. Wood-burning stoves in the living room and downstairs game room warm you with radiant heat. Upstairs in the private master suite just flip on the propane heat stove on a stunning floor-to-ceiling rock hearth. An enclosed office, sitting area, walk-in closet and wraparound deck complete the luxurious suite. An attic fan cools it. A second master suite on the main level is perfect for visitors who don't like stairs.

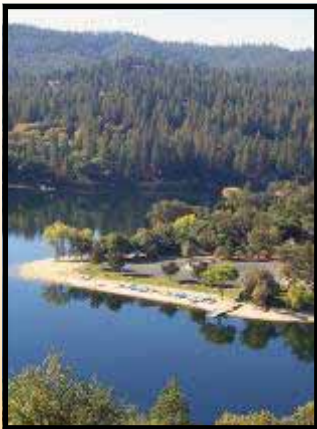

The kitchen is warmed by natural cherry cabinets and oak floors. The bar and counters are a light swirl granite. Vaulted ceilings in the great room and dramatic entryway. Skylights in the kitchen, hall & bath. The large laundry/utility room opens to the garage, kitchen and "barbecue deck", with plenty of cabinets for pantry goods. Pleated shades and

mini blinds throughout. Use the unfinished 540 sq ft bonus room for storage, shop or hobby room. 68 gallon propane water heater. Central heat and air conditioning. Back your boat in to the circular concrete drive and 3-car garage. On private septic system. Most furnishings negotiable. Exterior spotlights on side of house for wildlife viewing and security.

Three merged lots make up the one acre, with merged lots on either side, too!
